3,3-6KVA single/single-phase

The **DIALOG DUAL** range is available in 3300-4000-5000-6000VA models, with on-line double conversion (VFI) technology. The **DIALOG DUAL** range may be placed directly on the floor or mounted in 19" rackmount cabinets such as the Multi Shelter range.

In terms of technology, features (selectable On-line, Economy and Smart Active operating modes), and diagnostics such as the digital display, RS232 and USB interfaces, network adaptor card option and **PowerShield<sup>2</sup>** software included, **DIALOG DUAL** is easily the best solution for protecting "mission critical" applications requiring the highest levels of reliability.

**DIALOG DUAL** is ideally suited for a whole range of applications from IT to security.

#### **CHARACTERISTICS**

- the UPS can be installed as a floor standing tower or 19" rack mount UPS. The front panel digital display can be pulled out (using the keys provided) and rotated to suite the installation format
- reliable, filtered, stabilised and regulated sinewave output (double conversion technology VFI in conformity with IEC 62040-3 specifications) with filters for atmospheric disturbance suppression
- low noise level (<40dBA) thanks to the digitally PWM controlled ventilation system which is load and temperature dependent, and the use of an inverter with a high switching frequency (>20kHZ, above the audible range)
- optional bolt-on maintenance bypass (DLD 500/600 models) to allow service without disruption to the loads
- user selectable operating modes in addition to true on-line mode:
- Economy Mode: selects Line Interactive VI technology to power non-critical loads from mains and archieve up to 98% operating efficiency
- Smart Active Mode: the UPS selects automatically whether to operate in On-line VFI or Line Interactive VI mode depending on the stability of the mains supply
- Emergency: the UPS can be programmed to work only when the mains fails - suitable for emergency lighting
- Frequency conversion 50 or 60Hz
- output voltage selection: 220-230-240Vac
- auto restart when mains power returns programmed using the front panel or using PowerShield<sup>2</sup> software
- bypass on: when the UPS is switched off, it automatically goes into bypass mode to charge the batteries

### STATUS

- 1. Normal
- 2. UPS on mains
- 3. UPS on battery
- 4. Load on bypass

#### 5. ALARM

UPS shutdown (permanent) Standby (flashing)

### 6. **MEASUREMENTS**

Input voltage and frequency Output voltage and frequency Battery voltage Output current Output load (%) Battery charge (%) Remaining back-up time Internal temperature

#### **CONFIGURATIONS**

- 7. Timer set
- 8. Frequency selected
- 9. Voltage selected
- 10. Operating mode selected

- automatic power down due to minimum load
- end of battery discharge pre-alarm
- delayed start up
- PowerShare output socket (2x10A IEC) functionality on DLD 500/600 models
- guaranteed output quality even with typical distorting IT loads with crest factors of 3:1
- rephasing of load as the UPS has an input power factor close to 1, with a sinusoidal input current
- completely digitally controlled
- automatic bypass with no break in power supply
- use of IMS (Insulated Metallic Substrates) modules

- status, measurements, and alarms available on the standard backlit display
- UPS can be updated digitally (flash upgradeable)
- highly reliable battery performance (automatic and manual battery tests)
- Unique Low Ripple Current Discharge (LRCD) to help prolong battery life
- hot-swap user replaceable batteries
- no limit extendable back-up time using modular design Battery Extension Packs
- increased ride through (without batteries) on mains breaks up to 40ms and for fluctuations ranging from 84 to 276Vac

Hot Swap battery

- 1. USB port
- 2. Serial port
- 3. Interface card slot SNMP or additional RS232 ports
- 4. Input thermal protection re-set
- 5. Input hardwired gland6. Output hardwired glands
- 7. Battery extension pack connector

- input protected by resettable thermally activated switch
- Back-feed protection: to avoid current being fed back into the mains should a fault occur
- increased short circuit current on the bypass
- increased overload capacity: 150% on inverter even when mains supply has failed
- performance guaranteed in temperatures up to 40°C
- manual switch over to bypass
- two IEC output plugs with thermal protection (DLD500-600).

# **MICROSOFT CERTIFIED PRODUCT**

Rear panel DLD500-600

Rear panel DLD330-400

DLD500-600 hot swap batteries

DLD330-400 hot swap batteries

# **ADVANCED COMMUNICATION**

- advanced, multi-platform communication for all operating systems and network environments:
   PowerShield² supervision and shut-down software included, with SNMP agent, for Windows 95, 98, NT4.0, 2000, 2003, Me, XP, Mac OSX, 9.X, Linux, Novell operating systems. The UPS is supplied with a communications cable for 'Plug and Play' PC connection
- plug & play feature
- USB port
- RS232 serial port
- slot for one of the following interface cards:
- Network adapter (Netman 102)
- Multiplexer (Multicom 352)
- JBUS/MODBUS interface (Multicom 302)
- RS232/USB card (Multicom 362)
- RS232/EPO\* (Multicom 372)
- Dry contacts card/EPO\* (Multicom 382)
- Microsoft certification.
- \* EPO is standard on DLD500-600 models.

## **2-YEAR WARRANTY**

External bypass option

MODELS	DLD 330	DLD 400	DLD 500	DLD 600
